Yarnfiti Community Art Project

Decorate the library with the dynamic art of yarnfiti. Discover the fun of creating beautiful, textural works of art with yarn instead of paint. Collaborate with other knit and crochet artists to cover the Orlando Public Library with colorful squares of fabric. Fiber artists, and aspiring fiber artists, of any skill level are encouraged to participate. We're knitting together a community, as well as a unique piece of art.

Join the fun at weekly events to learn, create and share our finished work. You're welcome to use one of our suggested patterns or experiment with your own design. Submit completed squares to any participating library location by Tuesday, October 31, or bring them to our Yarnfiti Installation Party on Thursday, November 2, 5–7 p.m. to incorporate into the final work. Invite family and friends to explore the exhibit at our opening reception on Saturday, November 4, 3–5 p.m.

To find our suggested patterns and a meeting near you, visit ocls.info/fiberarts or visit any library location for more information.

Photoshop This!

Would you like to improve the look of your photos? Register for a Photoshop class at a library location near you! We will show you the techniques to get started.

NEW! Photoshop Layer Blending Modes

Applying blending modes to image layers can quickly fix problems with exposure, shadows and highlights. Learn to use blending modes to generate artistic and creative effects on photos.

NEW! Colorize Vintage Photos with Photoshop

Bring new life to vintage photographs. Use restoration and colorization tools and techniques to add historically accurate color to your favorite photos.

Adobe Photoshop: Color Correction

Take an average photo and make it pop. Learn basic color correction techniques, as well as how to make global and location adjustments to images in Adobe Camera Raw.

Photoshop Level 1

Explore the Photoshop environment and learn basic functionality using selection and editing tools.

Photoshop Level 2

Add basic effects to images. Explore using layers, layer masks, free transform tools and text tools.

Photoshop Level 3

Take your work to the next level with advanced effects. Learn how to add layer styles, custom shapes, gradients and photo filters.

Photoshop Level 4

Apply common image editing techniques to retouch and restore photographs.

Project Management Know-how

Manage and track your project more effectively with the help of Microsoft Project 2013 classes at your local library. Register today!

Microsoft Project 2013 Level 1

Create a basic project plan, a resource calendar, define resources and task dependencies. Become comfortable with the workspace and switching to different views. Learn the processes in planning, tracking and managing a project.

Microsoft Project 2013 Level 2

Work with different task dependency types and explore different options to resolve resource over allocation. Use the sort and filter options to improve the viewing and grouping of tasks, and create baselines and milestones. View and export various types of reports.

More Ways to Excel!

Impress your boss and save some time in the process! Register for a Microsoft Excel class at a library near you to learn the basics and beyond! Streamline your worksheets and learn tricks and tips to improve your workflow.

Microsoft Excel 2016 Level 1

Input, format and save data in spreadsheets. Calculate data with basic formulas.

Microsoft Excel 2016 Level 2

Calculate data with the SUM and AVERAGE basic functions. Use auto features, including auto and flash fill to streamline your workflow.

Microsoft Excel 2016 Level 3

Analyze data with COUNT functions and recommended charts. Use absolute and relative references to ensure accurate calculation of your data.

Microsoft Excel 2016 Level 4

Format workbooks with frozen panes, headers and themes. Customize worksheets with sheet names, color coding and hidden sheets. Print your data for perfect reports and presentations.

Microsoft Excel 2016: Formulas and Functions

Calculate your data with formulas and functions. Use the Function Library to find the best fit for your project. Insert financial, logical, lookup, math and text functions.

Microsoft Excel 2016: Pivot Tables

Do you dread analyzing data? Simplify the process and create meaningful reports using the powerful PivotTable tools. Learn how to create and customize PivotTables and PivotCharts using Microsoft Excel.

Microsoft Excel 2016: Data Management Level 1

Use advanced sort and filter options. Apply validation and other tools to organize your data.

Microsoft Excel 2016: Data Management Level 2

Apply subtotals, outlines, consolidation and conditional formatting to organize your data.

Microsoft Excel 2016: Interactive Reports

Create stunning interactive reports for presentations and analysis. Use Power View reports to insert data tables, charts and maps onto a seamless canvas. Switch visualizations, filter and summarize data to create reports for interactive viewing.
